About us:
At Framos, imaging is our passion. Imaging is a key technology in automation, robotics, and industry 4.0; it is used in many applications including creating modern production lines, advances in the operating room, self-driving cars, robots and drones. FRAMOS is a family owned company and the leading provider of imaging products and services. We have been helping customers since 1981 with the development of imaging driven technology and offer an extensive portfolio of products and services ranging from sensors to systems. Our team of more than 100 employees is working globally on finding the fastest and most efficient imaging solution for our customers. Together we are focused on enabling machines to see and think.
